OUTPUT OF MY TERRAFORM REPO CODE

1. Output of apply of code

```
Apply complete! Resources: 5 added, 0 changed, 0 destroyed.

Outputs:

hostname = "s3-website-test.clims.nik.net"
s3_bucket_arn = "arn:aws:s3:::s3-website-test.clims.nik.net"
s3_bucket_domain_name = "s3-website-test.clims.nik.net.s3.amazonaws.com"
s3_bucket_hosted_zone_id = "Z11RGJOFQNVJUP"
s3_bucket_name = "s3-website-test.clims.nik.net"
s3_bucket_website_domain = "s3-website.ap-south-1.amazonaws.com"
s3_bucket_website_endpoint = "s3-website-test.clims.nik.net.s3-website.ap-south-1.amazonaws.com"
```

2. Current State list

```
admin1@system1:~/clims-tech/terraform-aws-s3-website/examples/complete$ terraform state list
module.s3_website.data.aws_iam_policy_document.default[0]
module.s3_website.data.aws_partition.current
module.s3_website.aws_s3_bucket.default[0]
module.s3_website.aws_s3_bucket_policy.default[0]
module.s3_website.module.dns.data.aws_route53_zone.default[0]
module.s3_website.module.dns.aws_route53_record.default["s3-website-test.clims.nik.net"]
module.s3_website.module.logs.aws_s3_bucket.default[0]
module.s3_website.module.logs.aws_s3_bucket_public_access_block.default[0]
```
